

OMD Sales On-The-Go puts cutting-edge wireless technology in the palm of your hand. Powerful Sales Force Automation capability is seamlessly integrated with the OMD database. This product is available with OMD Vision, a suite of applications for managing the dealer's operation.

The sales professional will now have easy access to real-time information regarding customers and prospects - anytime, anywhere - using a wireless device, with the ability to update and add information as well as view:

### Contact Calendar

View calendar display of scheduled contacts and enter future appointments.

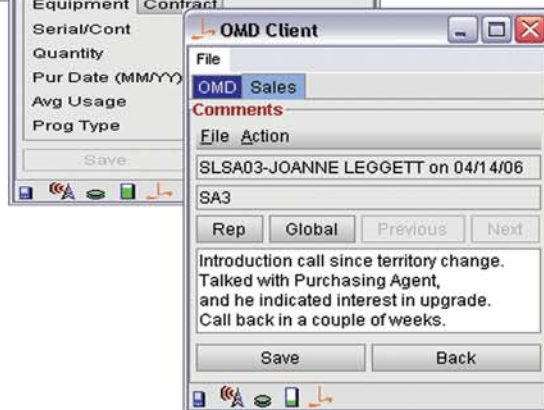

### Contact History

View your previous contacts

### Equipment & Contracts

View all competitive and non competitive equipment, copy/print volume, contract dates and rates. Also add competitive equipment as you encounter it.

### Comments / Notes

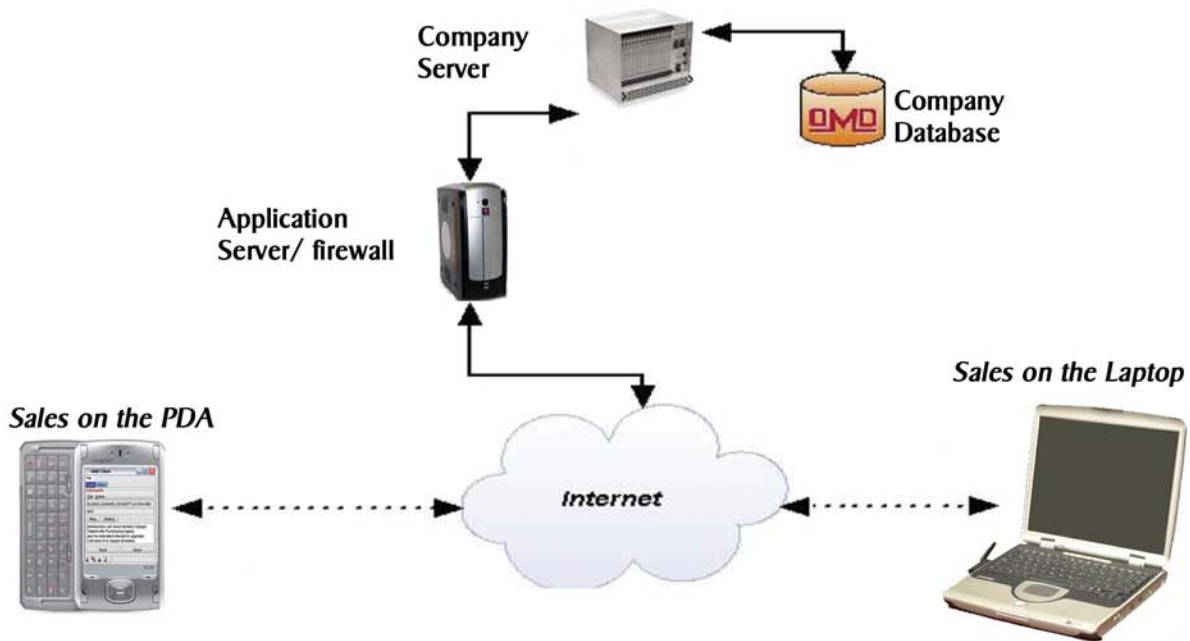

Access customer and prospect notes during meetings and phone calls. View past comments and enter new information

### Also includes:

- Contact Personnel
- Customer Purchase History
- Customer Service History
- Lead Source Activity
- Profile Information
- Proposals
- Sales Projections
- Marketing Demographics

CED Program Suite included at no charge when you purchase Sales On-The-Go
